

Ex.No.6

## JQUERY

### OUTPUT:

1.Create a hover effect on an element where it changes its opacity using jQuery.

When the user hovers on the image:

2. Create one textarea and one button. On click of the button the length of text entered inside the textarea will be displayed.

The screenshot displays a web page with a teal header labeled "JQUERY". The main content area has a light blue background and contains the instruction "Enter some text in textarea and find its length by clicking the button". Below this is a text area containing the text "Internet Programming". Underneath the text area is a button labeled "Calculate". At the bottom of the page, two lines of text are shown: "Length of the text in Textarea is: 20" and "Length of the text in Textarea Without Spaces: 19".
