CHOCLATE:

CHOCLATE

Chocolates are very delicious snack. Most of the children in the world like chocolates because of their sweetness.

Chocolate is a food made from roasted and ground cacao seed kernels that is available as a liquid, solid, or paste, either on its own or as a flavoring agent in other foods.

The antioxidants in dark chocolate have been shown to lower blood pressure, reduce the risk of clotting and increase blood circulation to the heart, thus lowering the risks of stroke, coronary heart disease and death from heart disease.

Flavonols prevent the immune system from going into overdrive and reduce oxidative stress, which is an imbalance caused by cells fighting against free radicals and a common cause of many diseases.

PEN:

PEN

A pen is a universal tool used for writing on paper. A pen has a plastic body called a barrel, a tip, an ink reservoir or chamber, and a cap. Different colours of ink can be used in a pen to write.

A significant phrase related to it is “**Pen is mightier than the sword**”.

It is used to write in paper. Nowadays, there are various types of pens.

They can be very useful, and whether you're at school, home, office or college, they're essential for drafting documents, jotting down notes, writing essays or giving examinations. Even though technological advancements continue to change the way we work, pens have remained to be indispensable.

Pens can symbolize a number of big ideas: freedom, intelligence, creativity, professionalism, determination, diligence, etc. As gifts, pens can symbolize the value you have for your gift recipient's freedom of thought. That's why pens are traditionally given as graduation gifts.

BOOK:

BOOKS

A book is a medium for recording information in the form of writing or images, typically composed of many pages (made of papyrus, parchment, vellum, or paper) bound together and protected by a cover.

The technical term for this physical arrangement is codex (plural, codices).

In the history of hand-held physical supports for extended written compositions or records, the codex replaces its predecessor, the scroll. A single sheet in a codex is a leaf and each side of a leaf is a page.

The ability to concentrate and focus for long periods is an essential skill for any student.

As a result of constant multitasking, notifications, and social media apps, this skill is becoming increasingly rare.

A Microsoft study confirms this finding, that people lose focus after only eight seconds. Thankfully, reading allows you to practice focusing on just one thing at a time. Novels, for example, require your full attention to transport you to another world and, in order to get the most out of a non-fiction book, you need to be fully engaged and present.

Hence, if you wish to focus more, you can practice by reading books.

MOBILE PHONE:

MOBILE PHONES

A mobile phone is a wireless handheld device that allows users to make and receive calls.

While the earliest generation of mobile phones could only make and receive calls, today's mobile phones do a lot more, accommodating web browsers, games, cameras, video players and navigational systems.

Also, while mobile phones used to be mainly known as "cell phones" or cellular phones, today's mobile phones are more commonly called "smartphones" because of all of the extra voice and data services that they offer. Life is easier with mobiles. It helps you to communicate with your near and dear ones through calls, video chats, text messages, emails.

Apart from that, it helps you to book a cab, show the map direction, order groceries and many more things. The main advantage of having a mobile is it helps to keep you connected with the entire world irrespective of your location.

PENDRIVE:

PENDRIVE

* The pen drive is a small removable storage device.
